

Healthy Kansas Minute Radio Interview – Safe Kids Kansas – Poison Prevention Week

This is the Healthy Kansas Minute. I'm Cherie Sage with Safe Kids Kansas, and March is Poison Prevention Month.

If you suspect a child has ingested a poisonous substance, please call the National Poison Control Hotline at 1-800-222-1222 and have the container handy.

If the child is choking, having trouble breathing or having a seizure, call 911 immediately. Do not induce vomiting or give the child fluid or medication unless directed to do so.

Parents should never refer to medication as candy and should securely store all poisons at any home a child frequently visits.

To learn more, visit the Safe Kids Kansas website at www.kansassafekids.org. This has been the Healthy Kansas Minute!
